

Guest Lecture

SUPERPOOL

Bild: © Superpool

By presenting their projects, the young and popular architects of Superpool are tracing a differentiated, partly unexpected image of Istanbul. With their research and exhibition projects Mapping Istanbul and Becoming Istanbul Selva Gürdoğan and Gregers Tang Thomsen are enhancing the debate about the city's future. Most recent Superpool has been participating in the Audi Urban Future Award 2012 to research mobility in Istanbul in 2030.
